Quote Task: Lipschitz Constant Estimation

```
═══════════════════════════════════════════════════════════
         QUOTE TASK LIPSCHITZ ESTIMATION
═══════════════════════════════════════════════════════════

ESTIMATED VALUES
─────────────────────────────────────────────────────────

L (max observed):     3.4311
L (99th percentile):  2.4035
L (95th percentile):  1.3527  ← RECOMMENDED
L (90th percentile):  0.8618
L (median):           0.1713
L (regression slope): 0.1384 (R² = 0.444)

═══════════════════════════════════════════════════════════
         QUOTE TASK MARGIN FORMULA
═══════════════════════════════════════════════════════════

Using L = 1.3527 and K = 1.0:

                |logit_diff|
margin_quote = ──────────────
                   2.7054

═══════════════════════════════════════════════════════════
         COMPARISON WITH BRACKET TASK
═══════════════════════════════════════════════════════════

Bracket Task: L ≈ 3.04 (previously estimated)
Quote Task:   L ≈ 1.35

Ratio: L_bracket / L_quote = 2.24×

This means bracket task is 2.2× MORE SENSITIVE
to perturbations than quote task.
